Experienced Full Stack Engineer with over 10 years of expertise in developing high-quality, scalable web applications. Specialized in `JavaScript`, `Python`, `PHP`, and other JavaScript frameworks like ReactJS and VueJS. Proven leadership experience managing diverse teams (15-25 members), overseeing complex project deployments, and driving agile software development practices. Adept at building and maintaining both frontend and backend systems, with extensive experience in API design, cloud technologies, and CI/CD processes.

- : JavaScript, , Ruby, HTML5, CSS3
- : ReactJS, , VueJS, AngularJS, EmberJS
- : , Ruby on Rails
- : PostgreSQL, MySQL, MongoDB, SQLite3
- : Docker, AWS (EC2, S3, RDS, Elastic Beanstalk), CircleCI, GitHub Actions, Capistrano, Terraform
- : Agile, Test-Driven Development (TDD), Behavior-Driven Development (BDD), Pair Programming
- : Git, Postman, RSpec, Cucumber, GraphQL

Stack: **S**, **ReactJS**, **N JS**, **N** . , *Ruby on Rails (GraphQL API)*, *Terraform*, *Docker*

- Developed scalable front-end applications using `Next.js`, `ReactJS`, and `Redux`, ensuring optimal performance across both web and mobile platforms.
- Built and maintained backend APIs with `Node.js` and `Ruby on Rails` (GraphQL), ensuring efficient data handling for web and mobile applications.
- Implemented infrastructure automation using `Terraform` to provision cloud resources and manage deployments.

- [REDACTED] Led applications and workflows with Docker, ensuring consistent [REDACTED] cross development and production.
- 

| March 2017 - March 2024

Stack: [REDACTED] S [REDACTED], ReactJS, N [REDACTED], Ruby on Rails, AngularJS, AWS, MySQL

[REDACTED] : Led a team of 15 engineers (8 backend, 7 frontend) in delivering multiple full-stack web applications.

:

- [REDACTED] : Directed the development of an appointment management and counseling platform, with key features in [REDACTED] for front-end development.
  - [REDACTED] : Led the development of an internal portal, providing auto-deployment functionality and improving operational workflows.
  - [REDACTED] : Led the development of an administrative dashboard, utilizing [REDACTED] and services to handle system-wide settings and billing.
- 

| June 2022 - November 2022

Stack: [REDACTED] S [REDACTED], N [REDACTED], Ruby on Rails, PostgreSQL, Docker

[REDACTED] : Led a team of 4 developers (2 backend, 2 frontend) for API development for MetroMart's mobile app (iOS and Android).

:

- [REDACTED] : Designed and implemented [REDACTED] using [REDACTED] and [REDACTED] to streamline product listings, customer orders, and payment processing.
  - [REDACTED] : Optimized API endpoints, improving data synchronization and order fulfillment by 30%.
- 

| April 2019 - March 2020

Stack: Ruby on Rails, PostgreSQL

[REDACTED] : Collaborated with a distributed team of 5 engineers to develop features for a customer experience platform.

:

- : Enhanced multi-channel communication tools, contributing to seamless integration with customer service systems.
- 

| August 2014 - March 2017

*Stack: Ruby on Rails, AngularJS, EmberJS, PostgreSQL, MySQL*

: Senior developer in a team of 8 engineers, contributing to projects in education and entertainment.

:

- : Developed reusable Ruby on Rails engines to simplify integration for new clients.
  - : Built a web application for beauty and wellness professionals, integrating third-party booking systems.
  - : Developed features for a real-life shooter game platform, enhancing the customer experience through dynamic team management.
- 

| March 2014 - May 2014

*Stack: Ruby on Rails, MySQL, AWS*

:

- : Developed a cloud-based IDE that supports multiple programming languages, offering static hosting and API integrations.
- 

| July 2013 - March 2014

*Stack: Ruby on Rails, AngularJS, jQuery, Coffeescript*

: Collaborated with 5 engineers and 2 designers.

:

- : Built features for live audition management, scheduling, and collaboration tools.
  - : Contributed to the development of a social networking platform, with features for profiles, messaging, and notifications.
-

| September 2012 - July 2013

*Stack: Ruby on Rails, AngularJS, MySQL*

:

- : Developed a collective buying platform, streamlining the purchasing process for buyers and suppliers.
  - : Built a quiz game platform, integrating multiple game modes and providing an API for mobile apps.
- 

| December 2011 - February 2012

*Stack: PHP, HTML5, CSS3, JavaScript, MySQL*

:

- : Led the redesign and development of the company's website, introducing a content management system (CMS).
- 

Central Luzon State University, Munoz, Nueva Ecija, Philippines  
2007 - 2012
